DETAILED ACTION

1. Claims 28-38 are pending. Applicant cancelled claims 1-27. The previous rejection is withdrawn pursuant to Applicant's September 8, 2004 Amendment.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 28-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bedell et al, US 6,622,128.

Bedell discloses monitoring Internet activity performed by a user client at a terminal comprising a client identifier, e.g. Fig. 3. Bedell does not specifically disclose recording the completion time of the Internet activity by a user on behalf of a client and generating a bill and a report based at least in part on a session record.

Official Notice is taken that recording the start/finish time of Internet activity by a user on behalf of a client and generating a bill and a report based at least in part on a session record was well known and common knowledge in the computer usage consulting art.

For example, providing a patent search report by a public patent searcher using the automated patent system (APS) (provided by the United States Patent and Trademark Office) that logged on/off times of usage while recording the search terms used and documents retrieved to provide a search report for a client, e.g. a private entity, a corporation or law firm, were common knowledge at the time of Applicant's filing of the present Application.

To have provided recording the start/finish time of the Internet activity by a user on behalf of a client and generating a bill and a report based at least in part on a session record for Bedell would have been obvious to one of ordinary skill in the art. The motivation for doing such would to have provided common knowledge report and billing data presented by a user on behalf of a client as was common knowledge in the computer usage consulting art.

Regarding claims 29-38, the particular Internet activities requested are deemed design choices as each of the particular type of data requested, e.g. a search term, are common knowledge and notoriously well known within the computer industry. Official Notice is taken of such. To have requested such would have been obvious to one of ordinary skill in the art.

5. Further pertinent references of interest are noted on the attached PTO-892.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
